

2021 ARCA Fast Facts

Sustainability and zero-landfill usage are at the core of everything we do.
People, Planet, Profits.

What ARCA Does

ARCA (Asset Recovery Company of America) is a leading global reverse logistics firm.

ARCA solves material disposition challenges within organizations of all sizes. Using our proprietary systems and web technologies, ARCA gives new life to inventory, equipment, and commodities by recovering the maximum sale price for assets that were once presumed dead.

Founded out of purpose and driven by technology, ARCA provides turn-key solutions for assets from any industry.

How ARCA Does It

These material disposition challenges are accomplished through Project Appraisals, Materials Processing, and the Recommerce or sustainable recycling of all materials. **Nothing is ever sent to a landfill.**

Where ARCA Does It

ARCA's main facility is located in Amherst NY, about 15 minutes northeast of downtown Buffalo. The company also has warehouses in Albany, NY and Pittsburgh, PA. ARCA frequently takes temporary warehouse space in other cities to accommodate the needs of our client base.

Who ARCA Does It For

Some notable clients of ARCA include the USA's Fortune 1000 list of companies. We also have contracts with various states, public and private universities, and several municipalities to take their surplus and fully depreciated assets. All clients receive reporting down to the pound, and on their desired timetable (W, M, Q, Y).
